# Project Manager Embedded

**MSc or BSc**
**Company: Centric TSolve – Embedded Solutions Den Bosch (NL), Hengelo (NL)**
**Vacancy Id: PME0002**

---

Would you like to manage complex projects or programs for embedded product developments in interesting (international) multi-disciplinary surroundings between many different development parties? Then we have the next career opportunity for you.

You will be responsible for managing (functionality, quality, cost, time) and guiding the execution of system and/or product development projects consisting of specification, design, development, validation, qualification, production and maintenance. Near-shoring or off-shoring scenarios are part of our service port-folio. You will also support the acquisition of system and product development projects and maintain contacts with our customers and partners.

## Your tasks

- Define and agree project plans with our customers and suppliers, reach commitment and manage them accordingly
- Guide and contribute to the work breakdown and estimation process
- Delegate to, co-ordinate and coach the leads and teams to achieve the project results in-time according to the agreed plans
- Monitor the planning and tracking of the activities and report to customer, involved parties and TSolve management
- Guide the team to work according structured product development and product quality processes
- Manage all interfaces to co-operation parties, suppliers and off-/near-shoring partners
- Support business and sales managers in the sales process with quotations and negotiations
- Manage risks

## Your personal profile

- You have a BSc. or MSc. degree in Computer Science, Software Engineering, Information Technology, Electrical Engineering or equivalent
- You have thorough project management experience and you used established project and program management methods and tooling (Prince 2, PMI)
- You have international experience and worked in complex multi-site and multi-cultural surroundings
- You can apply quality procedures in a professional product development environment
- You are customer oriented, have leadership, guts and excellent coaching and communication skills
- You have abstraction power, convincing and negotiating power and you are goal oriented
- You have excellent knowledge of the English and Dutch language (oral and written) and preferably also German language
- You like diversity in your job, you like to travel and are challenged by international, multi-party co-operation
- You have at least 8 years of relevant experience in a couple of mentioned application and technology areas:

© 2010 Centric TSolve BV

### Applications

- Technical systems containing embedded sub-systems
- Wireless and wired media products and systems
- Automotive products and systems

### Technologies

- Project and program management standards
- Embedded product development processes
- Quality assurance methods
- Affinity with embedded products and technologies

## About Centric TSolve - Embedded Solutions

Centric TSolve - Embedded Solutions is the professional product development partner for technical hardware and software engineering in embedded end-to-end solutions. We also provide generic services to support full product development like secondment, consultancy (project- and product management, quality assurance, architecture and life-cycle management) and near-shoring services.

As an autonomous part of Centric with regional offices in the Netherlands and Germany we offer our professional services to local and international customers. We apply our combined embedded and wireless expertise and components in the domains Transport & Automotive, Manufacturing and Healthcare.

## We offer you

- Challenging job in a company where commitment, openness, fairness and passion for technology are key values
- A high level of responsibilities and possibilities for personal development
- Advanced training possibilities
- An engaged and highly motivated team of colleagues
- Interesting salary with excellent job conditions
- Small company atmosphere within a big company
