

## **CENTRIC AEP – 'ATLAS' EXPORT PROGRAM**

### **'ATLAS' customs clearance**

Electronic customs declaration has been established as the normal procedure in Germany by law in the form of the minor Customs Code reform of 2005 (Zollkodexreform 2005 - VO 648/2005) and the associated regulation implementing the (Community) Customs Code (ZK-VDO). All parties that import or export goods into or from the EU must handle customs declaration using the electronic procedure for 'ATLAS' (the German Automated Tariff Classification and Local Customs Clearance System) and require appropriately certified software for this. In practice, this leads to major changes in the area of export handling procedures. The electronic export procedure using 'ATLAS' took effect on 1 August 2006 with the introduction of 'ATLAS-Ausfuhr' and the paper-based procedure was eliminated as of 1 July 2010.

#### **Centric AEP makes your JD Edwards solution 'ATLAS'-compatible**

Centric AEP is the solution for integration with your JD Edwards ERP system. Centric AEP makes your Oracle JD Edwards solution – JD Edwards EnterpriseOne und JD Edwards World – 'ATLAS'-compatible. Centric AEP supports you in the area of customs export formalities and processing consignments that you need to register with your customs office for export.

The 'ATLAS' solution comprises the FORMAT communication module integrated with the JD Edwards application. The communication module operates in an automated mode, has been proven in practice and is also certified by the customs authorities as 'ATLAS'-compliant. It handles all data communication with the customs computer system.

#### **Rapid deployment**

All of this is offered in your familiar environment:

- 'ATLAS'-compliant and reliable
- Up and running in next to no time
- Designed to allow efficient use by your employees.

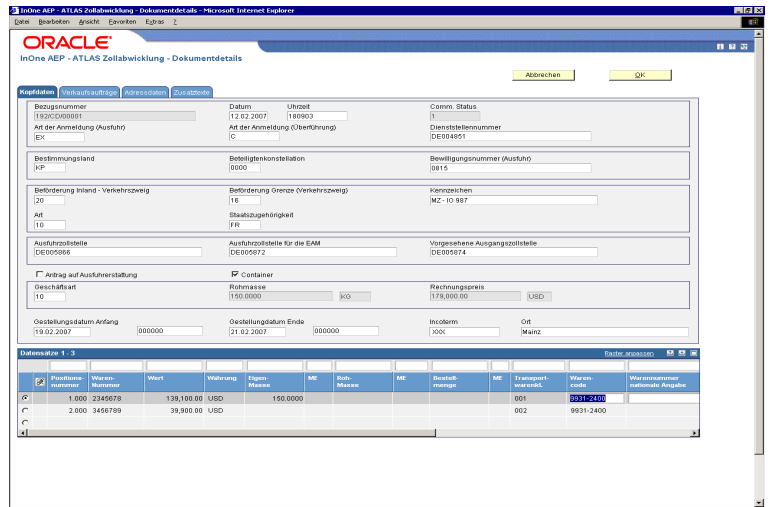

#### **Centric AEP offers important benefits:**

- Fully integrated in your Oracle JD Edwards ERP system
- Uniform user interface, simple navigation
- 'ATLAS'-certified
- Supports efficient export process handling
- Immediately operational

All essential information is displayed transparently in the JD Edwards solution in Centric AEP. You can manage and process the declarations to the customs office simply and easily using Centric AEP. To help you do so, Centric AEP displays a summary of the current status of open declarations. This summary can be accessed at any time.

### Centric AEP offers you all the functionality you require for 'ATLAS' customs processing:

- Creating new declarations
- Processing current declarations
- Formal data verification to assess correctness
- Automated information transfer
- Communication with the customs computer system via the FORMAT communication module
- Monitoring of the status of submitted declarations
- Ability to print the export accompanying document
